Description

EBIS-ENC4

The **EBIS-ENC4** system is the counter interface of the *EBIS IoT product family*. In addition to the standard features of the *EBIS product series*, the **EBIS-ENC4** unit has **3 sin/cos and 1 incremental counter inputs or 4 incremental counter inputs**. Furthermore to the sensor data acquisition, the system provides a **trigger input** (e.g. for footswitch) or **one output to control an axis (X3 Option)**. Due to the available versions and configuration options, a wide range of different sensors can be used and thus a wide variety of applications can be realized.

Applications

- Automotive industry
- Machine tool industry
- Optical industry
- Wind power plants
- Control technology
- Robotics
